

Sdl Trados Studio 2011 Professional Sp2 HOT! Full Activator Extr

September 19, 2555 B.C. - SDL has just released an update for Studio 2011 SP2. There are a few features worth mentioning and a few points to be aware of. First, we've added support for OpenSCAD and may even add SciTE support soon, along with our plan to ensure compatibility with the latest versions of Adobe and AutoCAD. We are also working on creating macros for Studio 2011. This can be useful in situations where you want to use AutoLISP but don't want to write all of your AutoLISP code. Another important new feature is the ability to use Studio 2011 to support large GPU projects.
