It has a built-in ad blocker and also gives you the possibility to view web content that's locked due to geographical restrictions. Gábor Kováts Windscribe for Chrome Crack For Windows is a browser extension designed to create a virtual private network (VPN), mask your online identity and keep you safe from hackers. It has a built-in ad blocker and also gives you the possibility to view web content that's locked due to geographical restrictions. To be able to use this app, it's necessary to sign up for a free account. To simply test the tool, it's required to set an email address. However, you can confirm it if you wish to extend

the monthly bandwidth for free, as well as explore different pricing plans for more features. Cruise Control for auto-changing your location The interface is quite intuitive, making it possible even for inexperienced users to quickly create a VPN. Windscribe has a so-called "Cruise Control" mode, which means that it autodetects when you're trying to access blocked websites and switches to another country automatically, thus attempting to make the content available to you. The VPN connection can be established with one click and just as easily turned off if you wish to return to your normal Internet connection. You can tell that it's off by the control window which turns from blue to grey. Whitelisted pages and secure links When you connect to another country, you receive a notification message from the lower-right corner of the screen. To exclude websites from the VPN while connected to a foreign country, you can

add them to a whitelist, which instructs Windscribe to not apply the proxy configuration to those pages. The Chrome extension has a special feature that copies URLs in a secure manner ("Secure.Links"), scans that page for ad beacons and third-party trackers, and gives you a privacy score. Optionally, it can be password-protected when sharing it with your friends. You can also request your friends to install Windscribe to be able to view the URLs. Customize privacy options As far as privacy options go, you can enable "Anti-Social" mode to remove social media buttons from visited pages, disable the blocker for ad beacons and tracks on "Secure.Links", disable the built-in ad-blocker, and enable "Split Personality" to

Windscribe for Chrome does more than that. It helps you browse websites anonymously and securely. It

detects if you're connected to a VPN and changes your location to one based on your chosen country. That means if you're in the United States but need to view a website blocked in your country, Windscribe for Chrome will automatically connect you to a VPN that provides access to that content. Windscribe for Chrome is a simple extension that lets you browse the internet safely with a virtual private network. It blocks ads, trackers, and other annoying online elements to help keep your web browsing private. Browse the web anonymously When you use Windscribe for Chrome you can use a proxy to make it look like you're browsing from a different location. This means your web activity is harder to track and malicious websites are unable to learn your location or your browsing history. The extension is simple to use. Simply click to connect, choose the country you're visiting from and connect. This provides access to all websites that are

available to the chosen country. Windscribe for Chrome works automatically when you're connected to a VPN, and no additional steps are required to use it. You can also keep your Windscribe for Chrome session running at all times to continue to protect your web traffic. Download web content blocked in your country Sometimes, you need access to content that's blocked in your own country. Windscribe for Chrome can download it for you without you having to leave the website. The extension detects if you're connected to a VPN and connects you to a website that's also blocked in
